

## Project Development PhaseModel Performance Test

Date	03 November 2022
Team ID	PNT2022TMID09721
Project Name	Project – Analytics for HospitalsHealthCare Data
Maximum Marks	10 Marks

### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.N o	Parameter	Screenshot / Values
1.	Dashboard designs	<p>No of Visualizations / Graphs –11 dashboard tabs with 1-2 visualizations ineach dashboard</p> 
2.	Data Responsiveness	<p>It hides certain aspects of the visualization if the size is limited, to maximize the space that is available to display data.</p> <ul style="list-style-type: none"> <li>There was two different datasets with the common column and full outer join was done by that common column.</li> <li>There was another dataset with various continuous values, those values were grouped as common.</li> </ul>
3.	Amount Data to Rendered (DB2 Metrics)	<p>There are some relevant datasets are uploaded in the IBM DB2.</p> 

4.	Utilization of DataFilters	<p>If any similar datasets in the provided area this is reduced by joining the common column of those two dataset. i.e. Cardinality is used.</p> 
5.	Effective User Story	<p>No of Scene Added – 10 stories with 1-2 visualizations in each story</p>  <p>◆ The most common values of Bed Grade are 2 (38.8 %) and 3 (34.7 %), together occurring over 234 thousand times, which is 73.6 % of the total.</p> <p>◆ The total number of results for Department, across all bed grades, is over 318 thousand.</p>
6.	Descriptive Reports	<p>No of Visualizations / Graphs – 2 reports with 3 – 5 visualization in each report</p>
